

Title: جدید آبیاری نظام
Language: Urdu
Written by: Sikandar Brohi
Publication Year: 2007
Theme: Agriculture

Participatory Development Initiatives (PDI) has been working in Balochistan on disaster risk management as well as efficient irrigation systems. The organization has made a number of successful experiences of efficient irrigation system in this water starved province of Pakistan.

The book is designed to understand modern irrigation systems which are needed to reduce water consumption and increase crop yields. The book includes comprehensive knowledge on drip irrigation for high efficiency rate, with potential for increase of crop production output.

This booklet supports the farmers to use the water and manage their needs with modern techniques utilized by developed countries. The book includes topics such as flood system, sprinkler system, drip irrigation system, uses of fertilizer, low electricity consumption,
